

RE-OPEN. STAY OPEN.

A successful business is a business that builds trust by protecting its employees and customers.

Create an environment that welcomes customers back AND reduces fears about the spread of coronavirus (COVID-19).

Re-opening smoke-free is an effective way to help secure your business's future as we fight against COVID-19.

SMOKE-FREE ENVIRONMENTS:

Eliminate blowing smoke which could carry COVID-19 droplets

Promote mask-wearing

Reduce exposure to harmful cancer-causing chemicals found in secondhand smoke

Reduce the probability of developing lung disease and infections

Reduce exposure to thirdhand smoke, which can be found on bar surfaces, glassware, and furniture

Why take any more chances?

Help keep Louisiana healthy, working, and enjoying life.
